Welcome Guardians to Our Kindergarten SeeSaw Digital Learning Portfolio!

What is a Learning Portfolio? Why is it important to Kindergarten?

The Kindergarten SeeSaw Digital Learning Portfolio is important in many ways. This digital learning portfolio will allow the teacher to communicate your child's learning growth and development on a daily, weekly and monthly basis. SeeSaw supports the teacher in offering an immediate and personalized window into your child's school day, encouraging continual communication between home and school.

Why Use Seesaw?

Empower students to document their learning as it happens

Develop students' writing skills, reflection skills and critical thinking skills

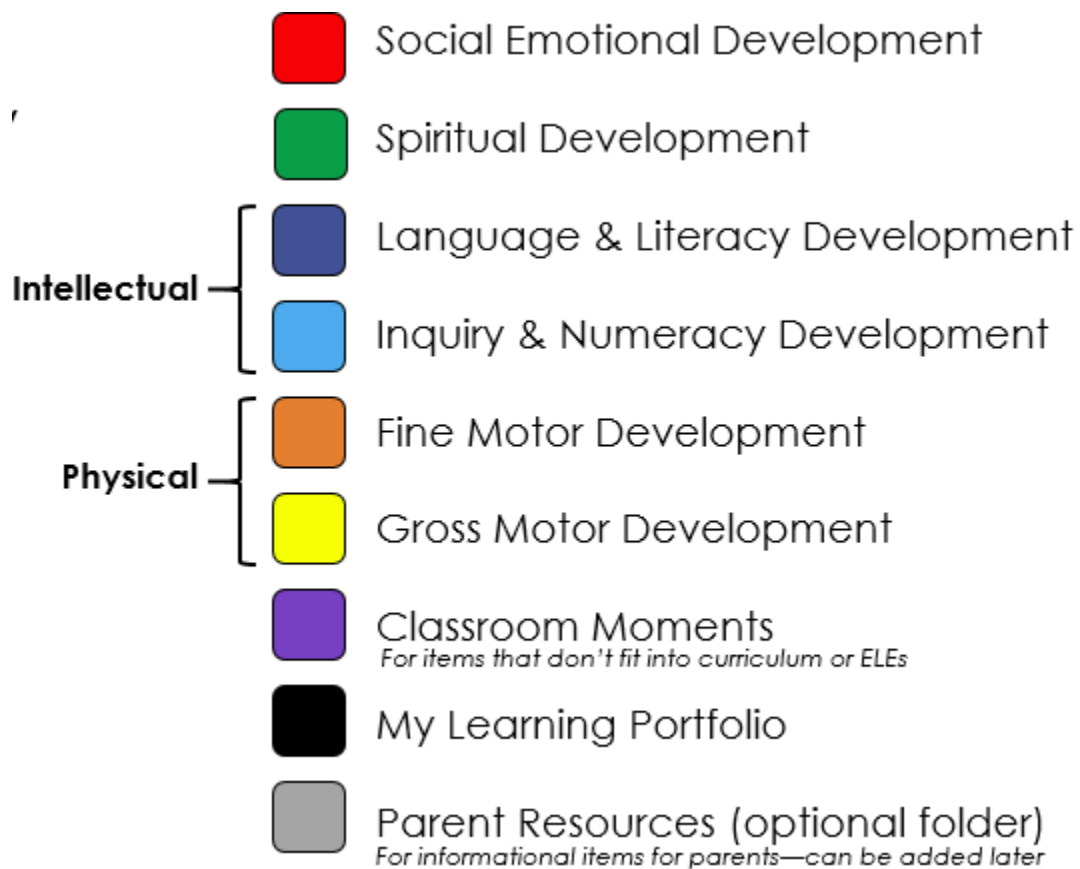

Give students voice and ownership

Develop 21st Century skills in safe, moderated environment

Create a strong community around learning

Involve families in their child's learning in real time!

Posts on the Kindergarten Seesaw Digital Learning Portfolio are categorized into the following main areas of development: Spiritual, Language and Literacy, Inquiry and Numeracy, Social Emotional, and Fine/Gross Motor. These posts will inform of current learnings as well as share your child's strengths and areas of challenge. An additional category within your child's portfolio may be utilized in order to document general school and class activities as well as special events.

Most importantly, the Kindergarten SeeSaw Digital Learning Portfolio gives your child the opportunity to reflect upon his/her learning during the year. When children look at photos, they remember their experiences and talk about them. Giving your child the chance to discuss the posts in the learning portfolio helps to develop self-confidence and self-awareness. It also helps to solidify the learning that took place during the activities in the photographs.
